

# Setting Your Payment Alert Preferences

When you make a Quick Pay payment for an online bill, Quicken keeps you informed about that payment's status. You can be alerted when a payment is successful or if there are issues with the payment.

You can control the alerts Quicken sends you by selecting **Manage Bill and Payment Email Alerts** from the **Settings** menu under **Bills**.

From there you can select when you will be alerted. You can get an alert when a bill is updated, due, overdue, and when the payment needs your attention. You can get an alert when a payment is successful or canceled.

Quicken can send a text alert if a Quick Pay online payment fails (an email is always sent if a Quick Pay online payment fails). You can use **Settings** to enter the phone number that Quicken will send the alert to.
