

About the current profit or loss (In/Out/Profit/Loss)

The current profit or loss is your balance for the current month as of today. Quicken determines this amount from the value of all the business transactions for the business, regardless of which type of account the transaction is in.

Quicken can estimate future values based only on the data it has. Inflows and outflows must be entered or scheduled in Quicken to be considered.

This feature requires **Quicken Business & Personal**. Learn how you can [upgrade Quicken](#) in minutes.
