

# Are these transfers between accounts?

Quicken has found what appears to be multiple transfers between your accounts. Before the transactions are entered into your registers, Quicken would like you to confirm that this is true.

- Select the matching transactions that should be entered as transfers.
- Click **Yes** to confirm the selected transfers. This will create a transfer of funds in Quicken from one account into the other account for each selected pair of transactions in the list.
- Click **No** to cancel all transfers. This will create individual (non-transfer) transactions in your Quicken accounts for all the transactions in the list.
