

Update Account Information

If you've changed your password at your financial institution, you'll need to update Quicken with the new password to maintain account access.

How to Update Your Password:

1. Input the new password associated with your customer ID and account.
2. Confirm the new password by entering it a second time.
3. Select **Update Now** to apply the changes.

Important Note:

The steps outlined above will reattempt the login process for the account currently selected in Quicken.

Screen Level Help

This help topic is designed to be accessed from a specific screen in Quicken. It is not a comprehensive topic. For more information see [Edit an account](#)
