

About the cash flow difference (In-Out)

Cash flow difference (In-Out) is the amount you have left for the month. Quicken determines this amount from the value of all the inflows and outflows you track in Quicken, and subtracts your payments and expenses for the month from your income and deposits for the month.

Notes

Quicken can estimate values based only on the data it has. Inflows and outflows must be entered or scheduled in Quicken to be considered.
