

How do I update my Quicken software?

As you use [online account services](#) throughout the year, Quicken checks to see if there is a free update to your version of the software. If an update is available, Quicken asks if you'd like to download it.

Use this procedure to update your Quicken software product; don't use it to [update transactions and balances](#) from your financial institution.

Update your Quicken software using either of the following steps:

1. Choose **Tools** menu > **One Step Update**.
2. Click **Update Now**.
 - If an update to Quicken is available, Quicken displays a window that describes what's in the update, as well as brief instructions for downloading the update.
 - You'll need to exit Quicken to run the update program.
 - When you exit, all your work is saved, and you can resume working as soon as the update finishes.

OR

1. Go to **Help** menu > **Check for Updates**.
2. Install the updates, if available.

Notes

Check the [Quicken Updates page](#) to find out what's in the latest update, to get instructions on how to determine what release you're currently running, and to obtain troubleshooting information should you have a problem performing an update.

Information about the difference between a [version](#), [an upgrade](#) and [an update](#) is available.
