

Show uncleared transactions as pending

This option is available only for manually added spending accounts (checking, savings, cash, and credit card) that are not enabled for transaction download.

- When this option is selected for an account, uncleared transactions (without a C or an R in the Quicken register) will show as "pending" on your mobile device.
- When this option is deselected for an account, uncleared transactions (without a C or an R in the Quicken register) will not show as "pending" on your mobile device; they will appear as if they are cleared.
- Another way to show the transactions as cleared on your mobile device is to [reconcile the account](#) in your Quicken desktop software.
